In this article, we will explore the major phases of cinematic history, providing a concise yet comprehensive overview of its evolution.

Origins of Cinema

The Birth of Moving Pictures

The story of cinema begins in the late 19th century, during a period of rapid technological innovation. Inventors around the world sought to capture and reproduce motion images, leading to the creation of early devices that could simulate movement. The key developments include:

1. **Phenakistoscope (1832):** An optical illusion device that created the illusion of motion using spinning discs.
