What Are Weathering and Erosion?

Before diving into the specifics of worksheets, it's important to clarify what weathering and erosion entail.

Weathering

Weathering refers to the natural breakdown or decomposition of rocks and minerals at or near Earth's surface. It occurs through physical, chemical, or biological processes, gradually transforming solid rock into smaller particles such as soil, sand, or clay. Types of Weathering: - Physical (Mechanical)

Weathering: Disintegration of rocks without chemical change, caused by factors like freeze-thaw cycles, thermal expansion, and abrasion. - Chemical

Weathering: Alteration of the rock's mineral composition through chemical
