Whether you're aiming to submit your opponent, create openings for strikes, or dominate a positional battle, mastering back control is essential. This comprehensive guide will explore the techniques, strategies, and mindset necessary to effectively utilize back control to get what you want on the mat, in the ring, or in self-defense situations.

The Significance of Back Control in Grappling and Self-Defense

Understanding Back Control

Back control is a dominant positional hold in martial arts like Brazilian Jiu-Jitsu (BJJ), Judo, MMA, and other grappling disciplines. It involves positioning oneself behind the opponent, often with hooks (legs or arms) secured around their body, limiting their mobility and options.

Why Is Back Control Important?

Back control offers multiple advantages:

1. **High Control Level:** It limits the opponent's movement, making escape difficult.
2. **Opportunities for Submission:** It provides access to chokeholds like the rear-naked choke.
3. **Strategic Dominance:** It allows you to dictate the pace and flow of the fight.
4. **Minimal Risk:** Proper back control reduces exposure to strikes or counters.

Getting What You Want with Back Control

Whether your goal is to submit, control, or neutralize your opponent, establishing and maintaining back control is often the most effective way to achieve those objectives.

Techniques to Achieve Back Control

Entry Techniques

Securing back control begins with effective entries. Here are the most common methods:

1. **Taking the Back from the Standing Position**
 1. Use takedowns or throws to bring your opponent to the

ground.

2. Drive for a seat belt grip or body lock, then slip behind.

2. **Back Control from the Guard**

1. From closed or open guard, set up a back take by breaking their posture.
2. Use techniques like the "body lock" or "sit-up back take".

3. **From the Top Position**

1. Transition from side control or mount to back control by underhooking or slipping behind.

Securing the Back

Once behind your opponent, securing the back involves:

1. **Hooks:** Insert your legs inside their thighs, wrapping around their hips to prevent escape.
2. **Seat Belt Grip:** Wrap one arm over their shoulder and the other under their armpit, gripping your own hands or wrist for control.
3. **Head Positioning:** Keep your chest close to their back, maintaining pressure and control.

Maintaining and Improving Back Control

Key Principles for Effective Back Control

To get what you want from back control, focus on the following:

1. **Secure Your Hooks Properly:** Ensure hooks are deep and secure to prevent escapes.
2. **Maintain Constant Pressure:** Use your chest and hips to keep your opponent pinned.
3. **Control the Head and Neck:** Use your chin and positioning to limit their movement and escape options.
4. **Stay Active and Adjust:** Be ready to adapt your hooks and grips as the opponent moves or attempts to escape.

Common Pitfalls and How to Avoid Them

1. **Loose Hooks:** Avoid losing hooks by constantly adjusting and securing them tightly.
2. **Overextending:** Keep your weight centered and avoid leaning too far forward or backward.
3. **Neglecting the Head Control:** Always keep the opponent's head in check to prevent escapes.
4. **Stiffness:** Be flexible and responsive to your opponent's movements, rather than rigid.

Techniques to Get What You Want from Back Control

Chokes and Submissions

Back control is most famously associated with chokeholds. Here are the most effective options:

1. **Rear-Naked Choke (RNC)**

 2. Place your other hand behind their head, locking in the choke.
 3. Apply pressure by squeezing your elbows together and pulling up on the choke.
2. **Bow and Arrow Choke**
1. Use the lapel or gi to create a leverage point.
 2. Pull the collar while extending your body for maximum choke effect.
3. **Body Locks and Arm Triangles**
1. Use controls to set up joint locks or shoulder chokes if the opponent exposes their arms.

Control and Ground and Pound

Sometimes, your goal might be to control and deliver strikes:

1. Maintain tight back control to limit their movement.
2. Use your positioning to open strikes or elbows while keeping control.
3. Ensure your hooks and grips are secure to prevent escapes during ground-and-pound sequences.

Escalating Control to Submission or Finish

Once you've established back control:

1. Look for openings—neck cranks, chokes, or transitions to other dominant positions.

Back Control Get What You Want: Mastering the Art of Dominance in Brazilian Jiu-Jitsu

In Brazilian Jiu-Jitsu, back control get what you want is more than just a catchy phrase—it's a fundamental principle that separates the proficient grapplers from the beginners. Mastery over back control not only provides a dominant position but also opens the gateway to a multitude of submissions and positional advancements. Whether you're aiming to secure a choke, transition to a more secure position, or set up a sweep, understanding the nuances of back control is essential for any serious practitioner.

The Significance of Back Control in Brazilian Jiu-Jitsu

Back control is often considered the pinnacle of positional dominance in BJJ. When you have your opponent's back, you're in an ideal position to threaten submissions, control their movements, and dictate the pace of the fight. The phrase “get what you want” encapsulates the idea that effective back control allows you to manipulate your opponent's options and steer the fight in your favor.

Why is back control so powerful?

1. It offers access to high-percentage submissions like rear-naked chokes, bow-and-arrow chokes, and collar chokes.
2. It limits your opponent's offensive options, forcing them

into a defensive stance.

3. It provides leverage for transitions to other dominant positions such as mount or side control.
4. It allows for strategic control, fatigue, and psychological pressure.

Mastering the art of getting what you want from back control involves understanding positioning, grip work, control points, and the tactical mindset to capitalize on every opportunity.

Foundations of Effective Back Control

Before diving into advanced techniques, it's crucial to grasp the core principles that underpin successful back control.

1. Securing the Back: The Initial Entry

Getting to the back is often the most challenging part. Common methods include:

1. Taking the back from guard or half-guard: Using hooks, grips, and movement to peel your opponent's hips away and establish back control.
2. Trailing behind during scrambles or takedowns: Capitalizing on opponent mistakes or openings.
3. Transitioning from other dominant positions: Such as transitioning from mount or side control when your opponent attempts to escape.

1. Establishing and Maintaining Hooks

The hooks (your legs inside your opponent's thighs) are essential for control.

1. Number of hooks: Typically, two hooks (one on each side)

provide the best control.

2. Placement: Deep and secure hooks prevent your opponent from escaping or turning.
3. Adjustments: Use your hips and grips to maintain optimal hook position as your opponent moves.

1. Controlling the Neck and Shoulders

A key to effective back control is controlling your opponent's upper body.

1. Seatbelt grip: Securing one arm around their torso with the other hand gripping the far side collar or chest.
2. Hand placement: Keeping your hands high and tight to prevent escapes.
3. Head positioning: Staying close and using your head to pressure and limit their movement.

Strategies to "Get What You Want" from Back Control

Once you've established back control, the next step is to capitalize—to execute your game plan effectively. Here are strategic approaches to get what you want:

1. Threatening Submissions to Create Openings

The threat of a submission often compels your opponent to defend, creating openings for other techniques.

1. Rear-Naked Choke (RNC): The most common and effective back control submission.
2. Setup involves securing the choke grip, ensuring your forearm is snug under the chin, and applying pressure.
3. Bow-and-Arrow Choke: Using your opponent's collar and

your grip to create a tensioned choke.

4. Typically set up by controlling the collar and pulling it across their neck while extending your back.
5. Lapels and Collar Chokes: In gi BJJ, leveraging lapel grips can increase control and threaten multiple choke options.

Tip: Always maintain constant pressure and threaten the choke to force your opponent into defensive positions, opening up other submissions or positional improvements.

1. Transitioning to Dominant Positions

Back control can serve as a launching pad for other dominant positions.

1. Mount: Transition from back control if your opponent turns or escapes.
2. Side Control: When your opponent attempts to turn into you, sweep or transition to side control.
3. Back to Top: Use back control to threaten a choke, then transition to a top position once your opponent reacts or attempts to escape.

1. Using Back Control to Set Up Sweeps

If your goal is to sweep and improve your position:

1. Back Control to Guard Pass: Use your control to pull your opponent into your guard and pass.
